

Add a Warrant Class in QapMap

Modified on: Fri, 3 Jun, 2022 at 4:48 PM

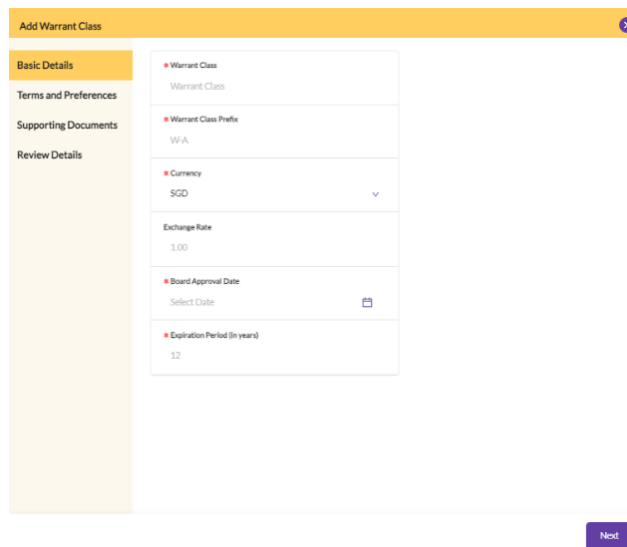

Adding a warrant class in QapMap is a simple and easy process.

Basic Details

1. To add a Warrant Class, click **Add Security Class** drop-down and select **Warrants Class**.

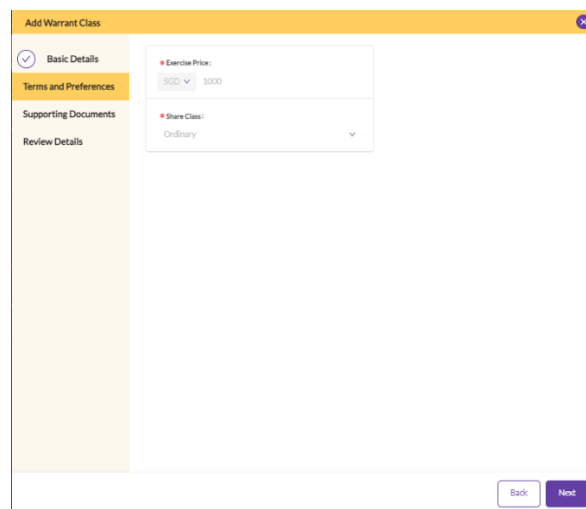

In the displayed Add Warrant Class dialog box, start by entering the Basic Details.

A screenshot of the 'Add Warrant Class' dialog box. The dialog has a yellow header bar with the title 'Add Warrant Class' and a close button. On the left, there is a sidebar with four tabs: 'Basic Details' (selected), 'Terms and Preferences', 'Supporting Documents', and 'Review Details'. The main area displays the 'Basic Details' form with the following fields: 'Warrant Class' (text input), 'Warrant Class Prefix' (text input with 'W.A.' entered), 'Currency' (dropdown menu with 'SGD' selected), 'Exchange Rate' (text input with '1.00' entered), 'Board Approval Date' (date picker with 'Select Date' button), and 'Expiration Period (in years)' (text input with '12' entered). A 'Next' button is located at the bottom right of the dialog.

1. Type the **Warrant Class** name.
2. Type the **Share Class Prefix** by which the share class will be recognised. The code you enter here is displayed for applicable shareholders in the dashboard. You can enter a two-three letter or numeric code to keep the share class display short on the Captable.
3. Select the appropriate **Currency** and corresponding **Exchange Rate** for the currency.
4. Select the **Board Approval Date**.
5. As the last step, select the **Expiration Period (in years)**.

Terms and Preferences

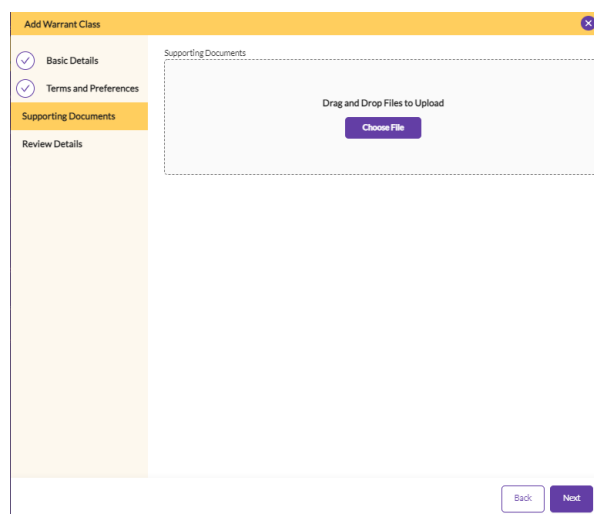

Next, you can specify the terms and preferences for the Warrant Class.

1. Set the **Exercise Price** for the Warrant Class in the appropriate Currency. This is the face value of the stock value as set in the corporate charter.
2. Next, select the **Share Class** which this Warrant class is associated with.

Supporting Documents

1. You can upload supporting documents for the round by dragging and dropping the files.

Review Details

Finally, you can review all the details entered and click **Create new Warrant class**.
