

# Introduction to QapMap

Modified on: Fri, 20 May, 2022 at 12:42 PM

QapMap helps private companies and investors manage their valuations, Cap Tables, investments, and ESOPs. Using QapMap, users can:

- Set up and manage security classes
- Create and maintain capitalisation tables
- Manage ESOPs accurately
- Engage with all stakeholders seamlessly
- Prepare Financial Model analysis for funding round and exit scenarios

QapMap allows users to manage these types of securities:

- Equity – Ordinary and Preferred Shares
- Convertible Notes
- Simple Agreement for Future Equity (SAFE)
- Warrants
- Employee Equity and Cash Instruments, including Options, Share Awards and SARs

Different stakeholders can use QapMap in the following ways:
