

Introduction to Captable

Modified on: Tue, 15 Nov, 2022 at 12:22 PM

A capitalization table, or Captable, summarizes the equity capitalization for your company. This table provides a detailed breakdown of a company's equity ownership and captures instruments such as common shares, preferred shares, warrants, convertible notes etc.

The Qapita captable helps organisations by:

1. **View all the transactions** including Share Issuance and Share Transfers directly on the captable
2. **Tailor the view of your captable** to suit your needs – make it as simple or as complex as you want
3. **Download the data** in your preferred format and layout

In QapMap, you can follow the below process to maintain the Captable when a new round of capital is raised from angel investors, venture capital firms or any other sources.

(<https://s3.amazonaws.com/cdn.freshdesk.com/data/helpdesk/attachments/production/72009673962/original/H9HPPrBzuMTCsqW7dQuMeyt03HnLrD3DY-w.png?1654256026>)

Qapita allows you to view the captable in different ways:

1. By Stakeholder - Details related to the stakeholders with their equity stake
2. By Security Class - List capital raised by security class, such as ordinary shares or convertible notes, or warrants.
3. As on date - Choose to see captable on a specific date or as on the selected share class.
