

Introduction to Transactions in QapMap

Modified on: Thu, 26 May, 2022 at 3:25 PM

QapMap allows administrators to manage different types of transactions (buying, allocation, transfer, repurchase, or cancellation) while administering different equity holdings.

These transactions can be broadly categorised as follows:

Primary

- Share Issuances
- Convertible Issuances
- Warrant Issuances

Secondary

- Share Buyback
- Share Transfers
- Share Issuances (Equity Awards)

Tertiary

- Share Issuances (Equity Awards)

To view transactions in QapMap, click **Ownership > Transactions** in the left menu. By default, the Share Issuances screen is displayed.
