

# Funding Round Scenario Screen

Modified on: Wed, 18 May, 2022 at 4:40 PM

In QapMap, a funding round scenario results page looks like this:

The results allow detailed insights into what a hypothetical funding round will mean for each of the existing and new shareholders on the Cap Table, as well as showcase the impact of any conversion of Convertible Notes, as well as Employee Option Pool top ups.

You will be able to see the calculations of the exact number of shares that will need to be allocated to the new investor(s), and everyone's updated fully diluted ownership percentage.

The scenario you have saved can be revisited at a later time.
